This light also comes on when the parking brake is not released. If the light turns off after the parking brake is fully released, the system is operating normally. On the instrument cluster : Follow the correction procedure After taking the specified steps to correct the suspected problem, check that the warning light turns off. If the front passenger's seat is occupied, the front passenger's seat belt also needs to be fastened to make the warning light warning buzzer turn off. Indicates that Dynamic Radar Cruise Control has been turned on. When constant speed control mode is selected, your vehicle will maintain a set speed without controlling the vehicle-to-vehicle distance. Select this mode only when vehicle-to-vehicle distance control mode does not function correctly due to a dirty radar sensor, etc. In vehicle-to-vehicle distance control mode, the vehicle automatically accelerates and decelerates to match the speed changes of the preceding vehicle even if the accelerator pedal is not depressed. In constant speed control mode, the vehicle runs at a fixed speed. Cruise control "SET" indicator will come on. The vehicle speed at the moment the lever is released becomes the set speed. When the acceleration exceeds Zone of Eco driving, and when the vehicle is stopped, the light turns off. Press the switch again to return to normal mode. Vehicles with Smart Key System The indicator light flashes after the engine switch has been turned off to indicate that the system is operating. With the headlights on, push the lever away from you to turn on the high beams. Pull the lever toward you to the center position to turn the high beams off. Pull the lever toward you and release it to flash the high beams once. You can flash the high beams with the headlights on or off. Turning on the high-beam headlights: With the headlights on, push the lever away from you to turn on the high beams. When driving on highways and freeways with white yellow lines, this function alerts the driver when the vehicle might depart from its lane and provides assistance by operating the steering wheel to keep the vehicle in its lane. The LDA system recognizes visible white yellow lines with the camera sensor on the upper portion of the windshield. When the warning buzzer sounds, check the surrounding road situation and carefully operate the steering wheel to move the vehicle back to the center of the lane. The warning light comes on and a warning message is displayed to indicate that the LDA system is not available temporarily or has detected a malfunction. Indicates that remaining fuel is about 2. A buzzer sounds and the warning light comes on and flashes to indicate that the master warning system has detected a malfunction. Follow the correction procedure After taking the specified steps to correct the suspected problem, check that the warning light turns off. Press the switch for powerful acceleration and driving in mountainous regions. Follow the correction procedure. After taking the specified steps to correct the suspected problem, check that the warning light turns off. Adjust the tire inflation pressure to the specified level. The light will turn off after a few minutes. In case the light does not turn off, even if the tire inflation pressure is adjusted, have the system checked by your Toyota dealer. When the light comes on after blinking for 1 minute: Malfunction in the tire pressure warning system. If the vehicle gets stuck in fresh snow or mud, the TRAC may reduce power from the engine to the wheels. You may need to turn the system off to enable you to rock the vehicle in order to free it. Push the switch again to turn the system back on. If the indicators flash faster than usual: Check that a lightbulb in the front or rear turn signal lights has not burned out. If the turn signals stop flashing before a lane change has been

performed: Operate the lever again. To discontinue flashing of the turn signals during a lane change: Operate the lever in the opposite direction. When the lever is pushed and held partway: The turn signals will keep flashing until the lever is released. Customization: The number of times the turn signals flash during a lane change can be changed. See Owner's Manual for more information.
